FungiNet supports the course

2015-07-24 16:29

The Collaborative Research Center / Transregio 124 Pathogenic fungi and their human host: Networks of Interaction - FungiNet supports our FEBS course by sponsoring travel costs and accommodation of one of our invited speakers.

FungiNet is a research initiative of scientists from Jena and Würzburg, Germany, aiming at better understanding host-pathogen interactions of human pathogenic fungi and funded by the German Research Council.

We are grateful for the financial support FungiNet provides to our course!
