

final lecture list

2016-02-01 12:00

We are happy to announce the final schedule for all lectures:

Monday, February 15

09:30 – 10:30 Lecture 1

Antifungal drug tolerance mechanisms and biofilm formation by the human fungal pathogen *Candida albicans*

Patrick Van Dijck, KU Leuven, Netherlands

11:30 – 12:30 Lecture 2

Virulence determinants of *Aspergillus fumigatus*

Sven Krappmann, University Hospital Erlangen, Germany

Tuesday, February 16

10:00 – 11:00 Lecture 3

Microbial interactions from a molecular point of view

Christian Hertweck, Hans Knöll Institute Jena, Germany

Thursday, February 18

13:30 – 14:30 Lecture 4

Beyond *Candida albicans*: Virulence and pathogenesis of "non-*albicans*" *Candida* species

Attila Gacser, University of Szeged, Hungary

Friday, February 19

14:00 – 15:00 Lecture 5

Human genetic variation in antifungal immunity and inflammation

Agostinho Carvalho, University of Minho, Portugal

Tuesday, February 23

14:30 – 15:30 Lecture 6
Candida-bacteria interactions in the CF lung and beyond
Deborah Hogan, Geisel School of Medicine, USA

Wednesday, February 24

13:30 – 14:30 Lecture 7
Systems Biology of infection
Thilo Figge, Hans Knöll Institute Jena, Germany
Oliver Kurzai, ZIK Septomics, Jena, Germany

Thursday, February 25

13:30 – 14:30 Lecture 8
Genome dynamics and drug resistance in *Candida albicans*
Judith Berman, Tel Aviv University, Israel

Friday, February 26

09:00 – 10:00 Lecture 9
Innate immune signals in anti-fungal defence
Jürgen Ruland, Technical University of Munich, Germany

15:00 – 16:00 Lecture 10
Investigating virulence mechanisms in cryptococcal infection
Robin C. May, University of Birmingham, UK
